Subject: RE: Printer Rush - no 903 form

I have had Cathy Short make up a new 903. Unfortunately, this case is old, before the 903 form was electronic. That means that she had to make up the form "in the blind," without benefit of the file in front of her. It appears that the application complied with 371 upon filing, because PALM indicates the "filing date" and the "effective date" both as July 24, 2001. PALM indicates the filing of a preliminary amendment, but does not indicate any claim to priority or IDS.

She will have the reconstructed 903 imaged, and I will mail the 903 together with a filing receipt. If there is anything missing from the reconstructed 903, presumably applicant will let us know...

Subject: Printer Rush - no 903 form

I recieved a printer rush in 09/889,881 indicating that there is no PCT 903 form. The IMIS dated 7/24/01 makes reference to the 903 form but I do not see one in the electronic file wrapper. Can you advise me as to what to do with this case? Thanks.
